Dear Hiring Manager,

I am writing to express my interest in a Junior .NET Developer or Azure Cloud Developer position within your organization. I recently completed a 400-credit Higher Vocational Education Diploma in Cloud Development with Azure and bring practical experience from two software development internships.

At ZoCom, I contributed to a containerized scheduling platform designed to replace a manually maintained Google Sheets Gantt workflow. I developed ASP.NET Core API functionality that worked with a Java service, JavaScript frontend, and SQL database. I also supported search and filtering across teachers, courses, locations, availability, and date ranges while collaborating through GitHub and daily Scrum practices.

During my internship at Superior Skills, I built an ASP.NET MVC HR management system with role-based authentication and permission management. I automated deployment using Azure DevOps CI/CD, deployed the application to Azure App Service and Azure SQL, and secured application secrets using Azure Key Vault and Managed Identity.

Alongside my internship experience, I have built cloud-focused projects including a multi-tenant applicant tracking system, an image-management application using Azure Blob Storage and Azure SQL, and REST APIs secured with ASP.NET Identity and JWT. This work has strengthened my skills in C#, ASP.NET Core, Entity Framework Core, SQL, Azure services, Docker, Git, and full-stack collaboration.

Before moving into software development, I spent more than five years in hotel operations and front-office management. That experience developed my ownership, communication, customer focus, and ability to solve problems calmly under pressure, qualities I now bring to software teams.

I would welcome the opportunity to contribute my .NET foundation, hands-on Azure experience, and motivation to grow within your development team. Thank you for your time and consideration. I look forward to discussing how I could contribute to your organization.

Kind regards,

Hany Magdy
