

Hany Magdy

.NET Developer | Azure Cloud Developer

Dear Hiring Manager,

I am writing to express my interest in junior opportunities within software development, .NET, Azure cloud development, backend development, or full-stack web development. I recently completed a Higher Vocational Education Diploma in Cloud Development with Azure, comprising 400 HVE credits, at JENSEN University of Applied Sciences.

My education covered object-oriented programming and systematic application development in C#/.NET, frontend development, Azure cloud services, cloud databases, continuous integration, and secure development with C# on Azure. I completed two software-development internships and a technical degree project, receiving Pass with Distinction in Secure Development with C# on Azure, Frontend Development, both internship courses, and my degree project.

During my internship at ZoCom, I contributed to ZoPlanner, a real scheduling platform designed to replace a manually maintained Google Sheets workflow. I developed ASP.NET Core Web API functionality integrated with a Java service, a JavaScript frontend, and a SQL database. I also worked with search and filtering across teachers, courses, locations, availability, and date ranges while collaborating through GitHub and daily Scrum practices.

At Superior Skills, I developed an ASP.NET MVC HR management system with role-based authentication and permission management. I created an Azure DevOps CI/CD pipeline, deployed the application to Azure App Service and Azure SQL, and protected secrets using Azure Key Vault and Managed Identity.

My selected projects include a multi-tenant SaaS Applicant Tracking System built with ASP.NET Core, Entity Framework Core, ASP.NET Identity, Azure SQL, App Service, and automated CI/CD; an image-management application using Azure Blob Storage and Azure SQL; and a full-stack auction platform using React, ASP.NET Core Web API, Dapper, SQL Server, JWT, Swagger, and unit testing.

These experiences have strengthened my skills in C#, ASP.NET Core, MVC, Web APIs, Entity Framework Core, SQL, React, JavaScript, Azure, Docker, Git, GitHub, Azure DevOps, CI/CD, authentication, testing, and system integration. I am curious, responsible, customer-focused, and comfortable working both independently and in agile teams. I would welcome the opportunity to contribute to real products while continuing to grow with experienced colleagues.

Kind regards,

Hany Magdy
