TECHNICAL SKILLS

BACKEND

C# ASP.NET Core
ASP.NET MVC Web API
EF Core ASP.NET Identity
JWT Auth Dapper

CLOUD (AZURE)

App Service Azure SQL
Blob Storage Functions
Key Vault Entra ID

DEVOPS

Azure DevOps CI/CD Git
GitHub Docker

DATABASES

SQL Server PostgreSQL
Azure SQL

FRONTEND

React JavaScript HTML
CSS Bootstrap

LANGUAGES

Arabic — Native
English — Fluent
Swedish — Intermediate

COMPETENCIES

- Problem-solving
- Team leadership
- Fast learner
- Ownership
- Working under pressure
- Customer communication

EDUCATION

JENSEN University of Applied Sciences
Cloud Developer with Azure
Aug 2024 – Jun 2026

JENSEN University of Applied Sciences
Programming 1 & 2
2024

DRIVING LICENSE

Class B — Yes

PROFESSIONAL SUMMARY

Junior .NET Developer specialising in building and deploying cloud-native applications on Microsoft Azure. Experienced across the full development lifecycle — designing REST APIs and relational database schemas in C# and ASP.NET Core, securing applications with ASP.NET Identity and JWT authentication, and deploying production-ready solutions to Azure App Service backed by Azure SQL Database and Azure Blob Storage. Comfortable working with Entity Framework Core, Azure DevOps CI/CD pipelines, Docker, and Git-based version control in cross-functional teams. Builds full-stack solutions by pairing this backend and cloud expertise with React and JavaScript frontends, and brings a background in operational leadership that translates into strong ownership, clear communication, and a pragmatic, user-focused engineering mindset.

FEATURED PROJECTS

ATS — Applicant Tracking System FLAGSHIP

Devotion Ventures

Designed and built a production-style, multi-tenant SaaS applicant tracking platform in ASP.NET Core, architected around separate customer and admin tenant workspaces with strict data isolation. Implemented secure authentication and role-based authorization using ASP.NET Identity, giving each tenant controlled access to recruitment data. Deployed to Azure App Service with a SQL Server/Azure SQL backend and an Azure DevOps CI/CD pipeline for automated, production-ready deployments, with a responsive UI across desktop and mobile devices.

Tech: ASP.NET Core, C#, EF Core, SQL Server / Azure SQL, ASP.NET Identity, Azure App Service, Azure DevOps, CI/CD, Multi-tenant Architecture

ImageStore Application

Built a cloud-based image management application with secure file upload and retrieval, storing image files in Azure Blob Storage while persisting metadata in Azure SQL Database via Entity Framework Core. Deployed to Azure App Service, demonstrating practical cloud storage architecture and secure file management.

Tech: ASP.NET Core MVC, Azure Blob Storage, Azure SQL Database, Azure App Service, EF Core, Bootstrap

Bank Management System API

Designed a RESTful banking API handling customer accounts, transactions, and loans, with secure endpoints protected by JWT authentication. Focused on clean REST architecture and reliable handling of financial data operations.

Tech: ASP.NET Core Web API, SQL Server, JWT Authentication, REST APIs

Auction Website

Delivered a full-stack auction platform integrating a React frontend with a .NET API backend, using JWT authentication and SQL Server via Dapper for lightweight, high-performance data access across the bidding workflow.

Tech: React, .NET API, SQL Server, JWT, Dapper, REST APIs, Swagger

INTERNSHIPS

HR Management System — Superior Skills, Stockholm

Internship · 2025

- Built a full-stack HR management system in **ASP.NET MVC**, implementing role-based authentication and permission management
- Designed and automated a **CI/CD pipeline**, reducing deployment time by approximately 40%
- Deployed the application to **Azure App Service** backed by Azure SQL Database
- Secured application secrets using **Azure Key Vault** and managed identity

API Integration Platform — Zocom, Stockholm

Internship · 2026

- Designed and implemented a **RESTful ASP.NET API**, integrating it with a Java backend microservice
- Managed **PostgreSQL** database interactions and optimized query performance
- Collaborated with the React frontend team to deliver end-to-end UI/UX features
- Owned version control workflows via **GitHub** across a cross-functional team

PREVIOUS EXPERIENCE

Hotel Operations — Reception & Front Office Manager

Stockholm Inn Hotel · Hoom Park Hotel · Ramilton Hostel | 2019 – 2024

- Led daily operations across three hotel properties over 5+ years, developing strong **leadership**, **ownership**, and **customer communication** skills in fast-paced, high-pressure environments — transferable to collaborative software teams
